

Explanation of Session Codes

The first letter of the code designates the day of the session (Sunday=S, Monday=M, Tuesday=T etc.). The second element indicates the session series in that day (for instance, A would denote the first oral session in that day, B would be second oral session). There is a poster session consisting of the oral contributed presentations from the previous oral sessions. The number on the end of the code (separated from the session code with a period) signals the position of the talk within the session (first, second, third, etc.). For example, a presentation coded MA.4 indicates that this paper is being presented on Monday (M) in the first oral session (A) of the day, and the fourth paper (4) presented in that session.
